

HOSTING VOTER REGISTRATION

VOTER REGISTRATION

Voter registration events can be held anytime. Voter registration is a great activity to hold outside of an election year, providing the opportunity to keep in contact with your voter base, serve the community, and generate volunteer interest. Coordinating your voter registration with a holiday or community event will increase participation.

TOOLS TO REGISTER VOTERS

We recommend using an online tool and having voters update their own voter files via their phone, iPad or computer. If you choose to manually register voters it is important to know your state laws, forms, timeframes and deadlines. The most comprehensive online tool is iwillvote.com. Voters can check their registration, update their information, and check voting hours and locations.

BEST PRACTICES FOR VOTER REGISTRATION

- Create signage with iwillvote.com and use a QR code voters can scan and pull up the web site.
- Have written instructions and details on issues and candidates.
- "Check in" with friends and family and use the opportunity to have them check their registration. "I was just checking my registration and thought of you" "I know you moved recently have you updated your registration?"
- Take action! Have a voter check their registration while they are with, do not put it off.
- Walk voters who are unfamiliar with technology through the website or app iwillvote.com.
- Be enthusiastic, energetic, and positive. Have fun!
